

THE FACTS: LSD

Sometimes called: Acid, Trips, Tabs, Blotters, Micro Dots

What it looks like:

Comes as tablets or on small pieces of blotting paper or stamps with pictures on them.

The Effects:

- Colours and patterns are brighter and sometimes distorted
- Good or bad trips depend on the mood of the user
- Once a trip starts, you need to wait for it to wear off
- Seeing or hearing things that aren't really there - can be frightening
- Time can seem to pass very slowly

How it's used:

Swallowed.

The Risks:

- A bad trip can lead to feelings of panic and paranoia.
- Can lead to accidents, injury or even death.
- Flashbacks, where part of a trip is remembered and relived can be scary and dangerous.
- If you have mental health issues LSD can make them worse.

The Law:

LSD is a Class A drug. Having LSD can lead to 7 years in prison and/or a fine. Supplying LSD (this includes passing it on to a friend) is punishable by up to life imprisonment and/or a fine.

Getting a criminal record can make it more difficult to travel abroad or get certain jobs.
